Data-driven Product Manager with a Master's degree from Carnegie Mellon University and over 3 years of experience.

EXPERIENCE

Octane11 | Product Manager

New York City | February 2024 – Present

Leading onboarding, data enrichment, and integrations to help B2B enterprises get better insights from their marketing data.

- Developed user-centric onboarding frameworks and templates that accelerated client deployment speed by 30%, and authored customer success playbooks that helped in significantly reducing the time-to-value for new clients.
- Launched a customizable white-label solution for the Octane11 platform by gathering and acting on feedback from agency clients, resulting in a 40% growth in user base and a 25% rise in revenue per account.
- Enhanced B2B customer profiles and lead qualification accuracy by 20% through data enrichment processes by collaborating closely with the data team to utilize third-party firmographic and intent data.

PNC Bank | Product Manager (Capstone Project)

Pittsburgh | August 2023 – January 2024

Built PoC for Customer Engagement Score metric to uplift retention and cross-selling, potentially increasing ARR by \$27 Million+

- Engineered a machine-learning based predictive analytics model using Python and SQL to analyze transaction data, customer interactions, and multi-channel communications, improving the statistical analysis and data-driven decision-making process.
- Developed and implemented a data-driven strategy that improved the identification of at-risk customers by 15%, allowing for proactive engagement strategies, reducing churn and increasing overall customer satisfaction.
- Facilitated Agile sprint planning and retrospectives, achieving a 30% faster milestone completion.

Slalom | Strategy and Transformation Intern

New York City | June 2023 – August 2023

Elevated the digital experience and supported broader digital transformation goals for a Fortune 100 client.

- Analyzed feedback from 250+ focus group participants and 500+ customer support tickets, leveraging sentiment analysis and keyword extraction to streamline issue resolution, cutting turnaround times by 20%.
- Leveraged Google Analytics and event tracking to refine the website interface, increasing user interactions with key conversion elements by 40%, and enhancing overall site performance.

Bubble Insurance | Product Manager

India | October 2020 – August 2022

Led cross-functional teams as the first product hire to build the digital consumer experience (0 to 1) for Life Insurance products.

- Generated 20% increase in sales by ideating and executing new product initiatives and owning the product roadmap for B2B tools. Collaborated closely with integration partners to comprehend pain points and future needs.
- Boosted conversion rates by 57% and increased lead activation by 28% through A/B testing and targeted customer surveys, which facilitated improvement in user engagement and reduced drop-off rates.
- Fostered stakeholder engagement and cross-functional team alignment by initiating a weekly email digest communicating updates, progress, and metrics aligned with the product vision, thereby expediting decision-making processes.

KrazyFox | Co-Founder and Product Lead

India | July 2020 – November 2021

Scaled KrazyFox, a digital influencer marketing agency, from 0 to 50+ brand partners, 1,000+ creators, and across 20+ campuses.
