EDUCATION

Savitribai Phule Pune University, Pune, India

August 2019 - July 2023

Bachelor of Engineering in Computer Engineering

CGPA: 8.59/10

EXPERIENCE

React Native Blockchain Developer

August 2023 - Present

Block Stack - Full Time

Bangalore, India

- Engineered the seamless integration of APIs with React Native for the PayCircle application, enabling swift and secure transfers between cryptocurrency and fiat currency
- Integrated diverse networks like Polygon, Diam, and Ethereum into the Diam Wallet using React Native, broadening its capabilities and accessibility.

Frontend Developer

April 2023 - July 2023

Abekus - Apprenticeship

Remote

- Orchestrated over 20 flawless API executions, empowering seamless data interchange and elevating application capabilities.
- Pioneered Redux implementation, revolutionizing global memory orchestration and amplifying both state management efficiency and code maintainability.
- Spearheaded 15+ comprehensive code reviews, imparting incisive insights and valuable feedback to nurture a culture of continuous improvement among team members

Frontend and UI/UX Developer

October 2021 - August 2022

Campus Innovations - Apprenticeship

Remote

- Integrated Forms for Learning Management System software. Strategically harnessed the potential of over 15 APIs
- Pioneered the innovation, design, and meticulous engineering of an avant-garde real-time chat system
- Championed an Agile development ethos, driving weekly sprint meetings that culminated in the effective execution of over 30 sprints across the development journey.

PROJECTS

Realtime Chat Application | *React Native, Node JS, AWS, Mongo DB, Figma*

- Built end-to-end realtime chat application. Worked closely on design to optimise usability and implemented frontend using React Native.
- Designed the overall architecture of the application using React Native, with Socket.io integration to allow realtime chat between 100's of people at same time.
- Created RESTful backend server enabling chats to be stored persistently in cloud storage and Written more than 50K+ lines of code to an established codebase via Git

Multi-Network Cryptocurrency Wallet: Effortlessly Handle Bitcoin and Ethereum | *React Native, Ether js*

- Developed versatile crypto wallet similar to MetaMask, with the added functionality of supporting multiple networks including Bitcoin and Ethereum
- Users will be empowered to securely send and receive both Ethereum and Bitcoin, all within a single, user-friendly interface

TECHNICAL SKILLS

Languages: C++, JavaScript, HTML/CSS

Frameworks: React Js, React Native, Typescript, Node.js, Material-UI, Express Js, Web3 js, ether js

Developer Tools: Git, VS Code, Visual Studio, Figma, Postman, Trello

Product Skills: Debugging, Designing, Problem Solving, Agile

Cloud: AWS (Amazon Web Services)

Data Engineering: Mongo DB

LEADERSHIP AND ACHIEVEMENTS

- Led a team of developers by providing technical mentorship, and fostering a collaborative work environment
- Alumni Technical Head at Entrepreneurship Development Cell, PVGCOET
